

Prevent the Nazi march in Bergedorf!!

On May 1, 2020, of all days, the traditional Labour Day, Nazis want to march through Bergedorf. They want to take their dull, racist, and ethnic nationalism to the streets.

Those who participate in this kind of march know what they are doing. They are utterly convinced National Socialists. Other groups with a similar nationalist ideology keep attacking all those who do not conform to their worldview.

These Nazis feel encouraged by a shift in the political discussion and mood in this country. Not only AfD, Pegida, or "Merkel must go" groups try to make racism and contempt for humanity socially acceptable.

After the series of murders of the right-wing extremist NSU, after countless other attacks, and after the attempted assassination of the Jewish community in Halle and the murders that occurred there

Acting now is of utmost importance!

We, the people of Bergedorf, who live in the shadow of the former concentration camp Neuengamme, are called upon to take action – together with many other people and groups from Hamburg and the surrounding area – against the openly militant appearance of Nazis.

These Nazis want to attack our ideas of democracy, a free, open, and tolerant society based on solidarity.

We will actively counter these attacks on May, 1, 2020, with a variety of creative actions.

We want many people to be on the streets and places in Bergedorf – so that there won't be any place for Nazis.

Bergedorf remains colourful! No place for the color brown!

Fascism is not an opinion, but a crime!

Bergedorf Alliance against Right
